

FL-01: AI Workflow Audit and Tool Setup

Name: ALI HANI

Introduction

As a Computer Science student, I spend most of my week working on programming assignments, learning new technologies, and building projects. Recently, I have started using AI tools to improve my productivity. This audit helped me identify where AI genuinely helps and where I should rely on my own skills.

Weekly Workflow Audit

Task	Classification	Reason
Writing Python code	Collaborate with AI	AI helps with ideas, but I write and test the final code.
Debugging programs	Collaborate with AI	AI suggests fixes that I verify myself.
Studying AI/NLP	Delegate to AI with Review	AI explains concepts quickly; I verify them.
Building projects	Collaborate with AI	AI assists while I implement the solution.
Writing internship emails	Delegate to AI with Review	AI improves wording before I send.
Updating GitHub README	Delegate to AI with Review	AI improves formatting and clarity.
Managing Git/GitHub	Collaborate with AI	AI explains commands; I review changes.
Planning study schedule	Fully Automate	AI can organize my weekly plan.
Quizzes & exams	Just Me	They should reflect my own knowledge.
Final project decisions	Just Me	Important decisions should be mine.

Claude Project

Project Name: AI Learning Assistant

Who I am:

I am a Computer Science student interested in AI, Machine Learning, NLP and software development.

Tone:

Professional, simple and step-by-step.

Current Goals:

- Complete my internship
- Improve AI skills
- Build portfolio projects

Three Target Tasks

Writing Better Python Code

Code runs correctly, is clean, and easy to understand.

Debugging Errors

Find the root cause, fix it, and understand the solution.

Writing Professional Emails

Professional, grammatically correct, and concise.

Create a project

How to use projects

Projects help organize your work and leverage knowledge across multiple conversations. Upload docs, code, and files to create themed collections that Claude can reference again and again.

Start by creating a memorable title and description to organize your project. You can always edit it later.

What are you working on?

AI Learning & Internship Assistant

What are you trying to achieve?

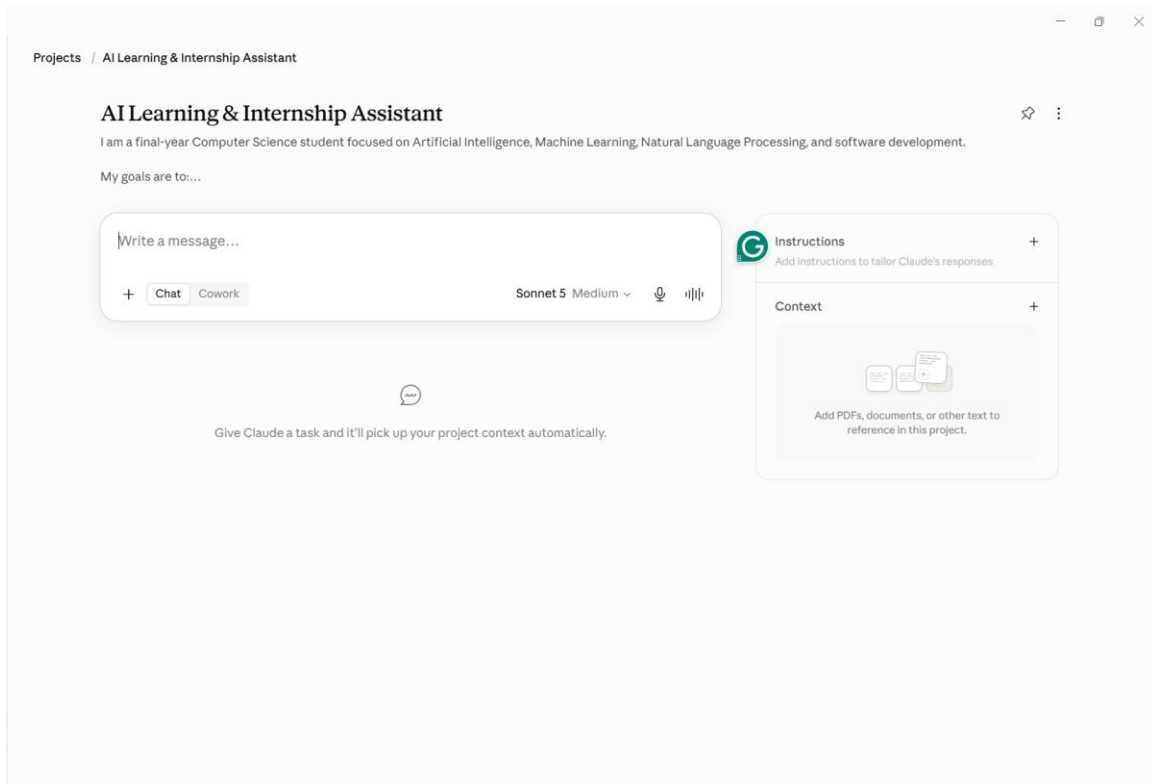

- Provide clean, well-commented code when needed.
- Suggest best practices and point out mistakes.
- Encourage me to understand the solution before using it.
- Keep responses professional and easy to follow.
